M106 · Mathematik 1 · 1. Semester

Seite 73

7a erster Wert für k muss 9 sein und nicht 5

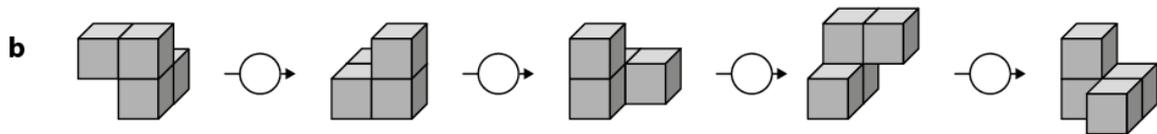

Seite 139

4

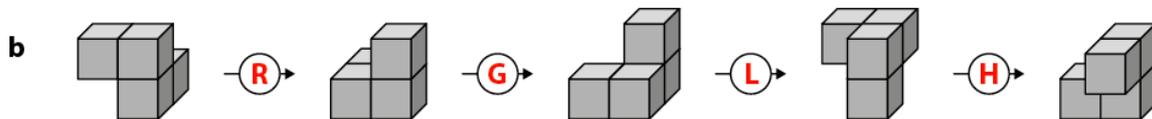

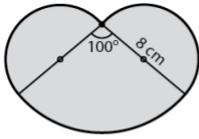

Seiten 151/152

1b entweder die Aufgabe ändern:

oder die Lösung anpassen:

$$u = d\pi + \frac{2d\pi \cdot 100^\circ}{360^\circ} \approx \mathbf{39.1 \text{ cm}}$$

$$A = \left(\frac{d}{2}\right)^2 \pi + \frac{d^2 \pi \cdot 100^\circ}{360^\circ} \approx \mathbf{106.1 \text{ cm}^2}$$

$$\frac{3}{4} = 0.75 = 75\%$$
